

NGUYEN HUU PHU

Backend Developer

Email: nguyenhuuphu190502004@gmail.com | **Phone:** 0962954690 | **DOB:** 19/05/2004

Location: Cau Giay, Hanoi | **GitHub:** <https://github.com/phunhph> | **English:** Professional Working Proficiency (Technical reading, written communication & chat)

PROFILE

Detail-oriented Backend Developer with **~2 years of professional experience** specializing in designing, building, and optimizing high-performance backend systems and databases. Expert in the **.NET ecosystem (ASP.NET Core, EF Core) and SQL Server**, with comprehensive experience in enterprise integration using **Microsoft Power Platform (PL-400 Certified)**. Proven track record of developing secure, scalable RESTful APIs, implementing robust Role-Based Access Control (RBAC), and resolving production database performance bottlenecks.

SKILLS

- **Backend Frameworks & Technologies:** .NET Core, ASP.NET Core, Entity Framework (EF) Core, Node.js (Express), Python (Flask), PHP (Laravel)
 - **Programming Languages:** C#, SQL, Python, JavaScript/Node.js, PHP
 - **Databases & Storage:** SQL Server, MySQL, PostgreSQL, MongoDB, Dataverse
 - **Enterprise Platforms & Low-Code:** Microsoft Power Apps, Power Automate, Custom API Connectors
 - **API Design & Security:** RESTful APIs, Role-Based Access Control (RBAC), OAuth 2.0, JWT
 - **Tools & DevOps:** Git, Docker, Postman, Nginx, Linux VPS hosting
-

WORK EXPERIENCE

HBLAB Joint Stock Company | Backend Developer | May 2025 – Present

MIESArchitectX (Jul 2025 – Nov 2025)

Tech Stack: .NET Core, EF Core, SQL Server

- **Architected and developed high-performance REST APIs** using C# and .NET Core to handle complex business logic and entity relations for real estate/architecture management.
- **Optimized SQL Server database performance** by writing efficient EF Core Linq queries, creating custom indexing strategies, and handling schema migrations for seamless production delivery.
- **Enforced secure data access** by implementing strict authorization protocols, ensuring zero data leakages across different organization tiers.

CRM Internal (Dec 2025 – Present)

Tech Stack: .NET, Power Platform, Power Apps, Power Automate, Dataverse

- **Built and integrated custom enterprise solutions** bridging standard .NET backend services and Microsoft Power Platform.
- **Developed custom API connectors and plugins** to synchronize business workflows, automating manual data transfers and reducing operational delays by 40%.
- **Designed custom canvas/model-driven Power Apps** and complex cloud flows to streamline sales pipelines and internal staff management.

247 Technical | Junior Backend Developer | May 2024 – May 2025

- **Menas (HR System):** Engineered secure Python Flask REST APIs for an internal HR platform, handling sensitive payroll/employee data and integrating JWT-based session and access control with a MySQL database.
- **Tour Vietnam Airlines:** Co-developed reusable modular backend APIs in Node.js and Flask; performed code refactoring and memory profiling, which optimized server resource utilization by 25%.

Freelance | Backend Developer | Sep 2023 – May 2025

- **School Management Platform:** Designed and implemented a robust database schema and REST APIs in Node.js (Express) and MySQL. Implemented a fine-grained RBAC permission system and real-time notification endpoints for over 500+ active student/staff profiles.
- **Exam System Upgrade** (Nov 2025 – Jan 2026): Refactored a legacy Laravel/Express API codebase to handle peak load spikes. Designed a highly cost-effective, background-queued migration pipeline moving large files from AWS S3 to Google Drive API using stream-based chunks.
- **AI-Driven Backends** (2025 – Present): Developed scalable Python-based backend pipelines for asynchronous PDF text extraction, plagiarism scanning, and a machine learning career-matching engine served via REST endpoints.

OTHER PROJECTS

- **PVF Management (PHP):** Developed core administrative APIs, audit log trails, and structured system documentation.
- **Student Capacity Exam (Node.js & Express):** Refactored and optimized backend delivery engines to support high-concurrency online exams.

EDUCATION & CERTIFICATIONS

- **FPT Polytechnic College** (2022 – 2024)
 - **Major:** Website Programming (Graduated) | **GPA:** 3.8 / 4.0
 - **Honors:** Ranked in Top 100 outstanding students; Won 2nd Prize in the FPT Self-Driving Car Competition.
- **Microsoft Certified:** Power Platform Developer Associate (**PL-400**)
