

NGUYEN HUU PHU

DevOps Engineer

Email: nguyenuuphu190502004@gmail.com | **Phone:** 0962954690 | **DOB:** 19/05/2004

Location: Cau Giay, Hanoi | **GitHub:** <https://github.com/phunhph> | **English:** Professional Working Proficiency (Technical reading, written communication & chat)

PROFILE

Driven DevOps Engineer with **~2 years of hands-on experience** in optimizing software delivery lifecycles, managing cloud/on-premise infrastructure, and implementing automated CI/CD pipelines. Highly skilled in **Docker, Nginx (load balancing, reverse proxies), and Linux system administration (Ubuntu VPS)**. Proficient in designing automated build, test, and deploy pipelines using **GitLab CI and GitHub Actions**, coupled with a strong background in script-based automation and environment standardization.

SKILLS

- **CI/CD & Automation:** GitLab CI, GitHub Actions, Shell Scripting (Bash), Cron automation
 - **Containerization & Deployment:** Docker, Docker Compose, Container registry management
 - **Infrastructure & Web Servers:** Linux VPS (Ubuntu/Debian), Nginx (Reverse Proxy, Load Balancing), SSL/TLS configuration (Let's Encrypt)
 - **Cloud & APIs:** AWS (S3, EC2), Google APIs integration, Cloud Storage cost optimization
 - **Monitoring & Reliability:** Uptime monitoring, custom health-check scripting, system/database backups
 - **Databases & Platform Ops:** SQL Server admin & deployments, MySQL backups & tuning, Microsoft Power Platform deployment support
-

WORK EXPERIENCE

HBLAB Joint Stock Company | DevOps / Deployment Specialist | May 2025 – Present

- **MIESArchitectX:**
 - **Standardized multi-stage environments** (Development, Staging, Production) for .NET Core apps and SQL Server databases, ensuring rapid, risk-free release cycles.
 - **Coordinated release deployment processes**, aligning backend developers, QA teams, and stakeholders to achieve zero-downtime application updates.
 - **CRM Internal:**
 - **Configured deployment bridges** and handled configuration management for custom .NET backend microservices integrated with the Microsoft Power Platform ecosystem.
-

247 Technical | Junior DevOps / SysAdmin | May 2024 – May 2025

- **Automated CI/CD Pipelines:** Architected and implemented automated GitLab CI pipelines for Python (Flask) and Node.js backend services, **reducing manual deployment overhead by over 80%**.
- **Containerization:** Containerized legacy and new web applications using Docker and Docker Compose, solving the "it works on my machine" problem across team environments.
- **Linux Server Administration:** Configured, secured, and maintained Linux VPS hosting environments; set up Nginx reverse proxies, configured secure SSL/TLS certifications, and established basic server monitoring metrics.

Freelance | Infrastructure & DevOps Engineer | Sep 2023 – May 2025

- **School Management Platform:**
 - **Implemented continuous deployment (CD)** workflows using GitHub Actions to automate code delivery to staging VPS hosts.
 - **Engineered automated database cron backups** and system health checks, maintaining 99.9% application availability.
- **High-Traffic Exam Infrastructure** (Nov 2025 – Jan 2026):
 - **Architected a high-concurrency server cluster** utilizing Nginx Load Balancing across multiple Linux VPS instances to comfortably handle peak examination traffic surges.
 - **Executed a secure, low-latency storage migration** from AWS S3 to Google Drive API utilizing background worker queues, successfully **slashing storage costs by 50%**.
- **AI System Deployments** (Aug 2025 – Present):
 - Provisioned and hardened secure production environments to run CPU/GPU-intensive Python and Node.js AI microservices (PDF data processing & plagiarism detection).

OTHER PROJECTS

- **Student Capacity Exam:** Built and deployed Dockerized application bundles to VPS nodes, handling rapid scaling under high exam loads.
- **PVF Management:** Managed server environments and configured Nginx configurations for staging and live production releases.

EDUCATION & CERTIFICATIONS

- **FPT Polytechnic College** (2022 – 2024)
 - **Major:** Website Programming (Graduated) | **GPA:** 3.8 / 4.0
 - **Honors:** Ranked in Top 100 outstanding students; Won 2nd Prize in the FPT Self-Driving Car Competition.
- **Microsoft Certified:** Power Platform Developer Associate (**PL-400**)
