

# NGUYEN HUU PHU

## DevOps Engineer

### CAREER OBJECTIVE

Dedicated **DevOps Engineer** with 2 years of experience in automating deployments, managing cloud infrastructure, and ensuring system reliability. Proficient in containerization, CI/CD pipelines, and Linux server administration. Adept at bridging the gap between development and operations to streamline delivery processes, optimize infrastructure costs, and implement robust load balancing for high-traffic environments.

### SKILLS & EXPERTISE

| Category               | Technologies & Tools                                                |
|------------------------|---------------------------------------------------------------------|
| Infrastructure & Cloud | VPS Management (Linux), AWS (S3, EC2), Google Cloud APIs            |
| Containerization       | Docker, Docker Compose                                              |
| CI/CD & Automation     | GitLab CI, GitHub Actions, Automated Deployments                    |
| Networking & Security  | Load Balancing, Reverse Proxies (Nginx), SSL/TLS, System Monitoring |
| Development Background | Python, Node.js, Bash Scripting, Git                                |

### FEATURED DEVOPS & INFRASTRUCTURE PROJECTS

#### School Examination System Infrastructure Upgrade | Nov 2025 – Jan 2026

- **Role:** DevOps Engineer | **Tech:** Linux VPS, Nginx, Docker, AWS S3, Google APIs
- **Key Impact:**
  - Architected and implemented **Load Balancing** across multiple VPS instances to guarantee 99.9% uptime and system stability during critical high-traffic online examination periods.
  - Executed a seamless migration of media storage from **AWS S3 to Google Drive API**, optimizing resource allocation and significantly reducing monthly infrastructure costs.
  - Standardized the deployment process and managed task allocation for infrastructure maintenance.

#### AI & Backend Systems Deployment | Aug 2025 – Apr 2026

- **Role:** DevOps & Deployment Lead
- **Key Impact:**
  - Managed the deployment and environment configuration for complex Python/Node.js AI engines (PDF Extraction & Career Suggestion Systems).
  - Configured secure server environments and ensured scalable infrastructure to handle intensive data processing and machine learning tasks.

 WORK EXPERIENCE

247 Technical | May 2024 – May 2025

DevOps & Backend Engineer

Internal & Client Projects (Menas & Tour Vietnam Airlines)

- **Tech Stack:** Docker, GitLab CI, Linux VPS, Nginx, Python, Node.js
- **Key Contributions:**
  - Established continuous integration and deployment (CI/CD) pipelines using GitLab CI to automate testing and deployment for both Python (Flask) and Node.js microservices.
  - Containerized legacy applications using Docker, improving environment consistency across development, staging, and production.
  - Administered internal Linux servers, configuring Nginx as a reverse proxy and ensuring system security and monitoring.

Freelance (Remote) | Sep 2023 – Present

DevOps Consultant & Developer

School Management Platform

- **Tech Stack:** GitHub Actions, VPS, MySQL
- **Key Contributions:**
  - Set up automated deployment workflows via GitHub Actions for a React/Node.js stack.
  - Configured automated database backups and managed MySQL database performance on remote VPS environments.
  - Implemented secure access controls and monitored server health to ensure continuous availability.

 OTHER PROJECTS

| Project                 | Role           | Tech Stack   | Key Contribution                                                                  |
|-------------------------|----------------|--------------|-----------------------------------------------------------------------------------|
| Student Capacity (Exam) | DevOps Support | Docker, VPS  | Handled production deployments and provided long-term infrastructure maintenance. |
| PVF Management System   | System Admin   | Linux, Nginx | Configured staging and production environments for reliable application hosting.  |

 EDUCATION & ACHIEVEMENTS

FPT Polytechnic College | 2022 – 2024

- **Major:** Website Programming

- **Achievement: Second Prize** – Self-Driving Car Competition (Organized by FPT Education) - Gained early exposure to hardware/software integration and automated systems.
