

NGUYEN HUU PHU

Junior Developer

CAREER OBJECTIVE

Motivated **Fullstack Developer** with a strong foundation in building scalable web and mobile applications. Experienced in modern backend architectures and AI integration. Passionate about system design, performance optimization.

SKILLS & EXPERTISE

Category	Technologies & Tools
Languages	Python, Node.js (JavaScript/TypeScript), C#, PHP, SQL
Frameworks	Express.js, Flask, Laravel, React.js, Vue.js, Flutter
Databases	PostgreSQL, MySQL, MongoDB, SQL Server
DevOps & Cloud	Docker, VPS Management, AWS S3, GitLab CI, GitHub Actions
Tools	Git, RESTful API Design, Low-code Platforms
Soft Skills	System Design, Problem Solving, Team Management, Business Analysis

FEATURED PROJECTS (AI & SYSTEM DESIGN)

AI-powered PDF Extraction & Anti-Plagiarism System | Aug 2025 – Oct 2025

- **Role:** Fullstack Developer | **Tech:** Python, Node.js
- **Key Impact:** Developed an AI engine to read, extract information from PDF files, and identify overlapping content for plagiarism detection. Designed logic for automated information categorization.

School Examination System Upgrade | Nov 2025 – Jan 2026

- **Role:** Fullstack Developer & DevOps | **Tech:** PHP (Laravel), Express.js
- **Key Impact:**
 - Implemented **Load Balancing** for the school's VPS to ensure system stability during high-traffic exam periods.
 - Optimized storage by migrating from **AWS S3 to Google Drive API**, reducing infrastructure costs.
 - Managed system deployment and task allocation.

AI-powered Career Suggestion System | Mar 2025 – Apr 2026

- **Role:** Business Analyst & Developer | **Tech:** Node.js, Applied AI Research

- **Key Impact:** Built an intelligent career matching engine based on user capacity profiles and market demand data. Successfully deployed for real-world career counseling.

 WORK EXPERIENCE

247 Technical | May 2024 – May 2025

Intern → Junior Fullstack Developer

Menas Project (Internal Product & HR Management)

- **Role:** Backend & Mobile Developer | **Tech:** Python, Flask, Flutter, MySQL
- Developed core REST APIs and built the mobile application using Flutter.

Tour Vietnam Airlines Project (Resource Management System)

- **Role:** Fullstack Developer | **Tech:** Node.js, Vue.js, Python, Flask, MySQL
- Developed reusable backend modules, optimizing performance and reducing dev time.

Freelance (Remote) | Sep 2023 – Present

Fullstack Developer

School Management Platform

- **Tech:** React.js, Node.js, Express.js, MySQL, Tailwind CSS
- Designed and implemented a robust Role-Based Access Control (RBAC) system.
- Developed real-time notification modules and comprehensive admin dashboards.

 OTHER PROJECTS

Project	Role	Tech Stack	Key Contribution
Public Security Platform	BA	Documentation, Docs	Requirements analysis & functional development for community projects.
PVF Management System	BA & Dev	React, Node, Express	Developed core modules and authored comprehensive system report documents.
Student Capacity (Exam)	Fullstack	React, Node, Express	Developed frontend/backend features and provided long-term maintenance.

 EDUCATION & ACHIEVEMENTS

FPT Polytechnic College | 2022 – 2024

- **Major:** Website Programming

- **Achievement: Second Prize** – Self-Driving Car Competition (Organized by FPT Education).
